

Installation of Joint Sealants *Standards & Guides*

Division 07 9200 Joint Sealers

Wayne BelCher
BelCher, Inc.

Now updated and revised, this practical guide and manual provides the latest knowledge and techniques for the installation of caulking and sealants for contractors, architects, engineers and specifications writers.

Specifically for contractors, sealant applicators, glaziers, and waterproofers, this manual contains up-to-date information on sealant selection, use, and application. Supplementary text on joint design, joint movement as they relate to various sealants, and application has been included to help the mechanic in the field to be successful in the artistry and craft of installing joint sealants. This manual of Standards & Guides is written with all the lessons learned in 25 years of experience and completing over \$60,000,000 in caulking contracts without claim, issue, or leaks.

The Art of Installing Sealants
